

# Test Glosario RMD Support

```
library(glosario)
```

Git

```
list_glosario_terms()
```

Terms	Definitions
data_frame	A two-dimensional data structure for storing tabular data in memory. Rows represent records and columns represent variables.
slug	An abbreviated portion of a page's URL that uniquely identifies it. In the example <a href="https://www.mysite.com/slug">https://www.mysite.com/slug</a> , the slug is "slug".
